

ARTICULATION AND TRANSFER

Transfer from CWI

CWI offers courses and programs designed to transfer to four-year colleges and universities. A student who plans to transfer should consult with a CWI advisor and make early contact with a representative from the institution to which they intend to transfer. It is also recommended that students consult the catalog of the transfer institution to see which courses will be required to fulfill graduation requirements.

Note: Any CWI course with a number below 100 is considered below a college freshman level and will not be accepted for transfer credit.

Transfer within Idaho

CWI has transfer articulation agreements with all Idaho public colleges and universities, ensuring that students who receive an Associate of Arts (AA) or an Associate of Science (AS) degree may transfer their degree to any public four-year school in Idaho. Students who receive an Associate of Applied Science (AAS) degree may transfer a minimum of 15 credits to all in-state public higher education institutions.

Students who complete requirements for the AA or AS degree will be considered as satisfying the General Education requirement upon transfer to a four year public institution in Idaho and will not be required to complete any additional general education requirements.

Students who have completed the 36-credit General Education program without an AA or AS degree upon transfer to another Idaho public post-secondary institution will not be required to complete additional general education requirements at the receiving institution.

Idaho General Education Matriculation (GEM)

All public, post-secondary institutions in Idaho recognize the articulation of General Education Matriculation (GEM) courses, identified within Written and Oral Communication and Ways of Knowing categories of the general education framework. If a student has completed GEM courses but has not completed the entire General Education framework or an AA or AS degree, those GEM courses will satisfy the associated GEM course requirement at the receiving institution. This policy applies to general education, lower-division requirements only. It does not categorically apply to specialized course requirements within the major, e.g., engineering, pharmacy, business, etc. Any student majoring in a degree program who plans to transfer specialized courses should consult with their advisor and make early contact with a representative from the institution to which they intend to transfer.

Transfer Outside Idaho

CWI also has articulation agreements with other Idaho and out-of-state institutions. For more information, please contact One Stop Student Services at 208.562.3000 or visit the Transfer Information webpage.

Transfer to CWI

CWI accepts transfer credits from post-secondary institutions accredited by a regional accrediting agency recognized by the U.S. Department of Education. The list of regional accrediting agencies can be found [here](#).

Transfer students who have earned an Associate degree or higher or who have completed the general education core from any regionally

accredited institution will be considered core certified, and will not be required to take additional lower division general education core courses. Transfer students must provide official transcripts that show the degree earned or the completion of general education core from the transferring institution.

Transfer students who have completed coursework at regionally accredited institutions but who have not earned a degree or completed the general education core should submit official transcripts for course by course evaluation. Those students who have met CWI's general-education core with transfer coursework will be considered core certified. Major courses are evaluated on a course-by-course basis regardless of whether the student has earned a degree or completed the general education core at any regionally accredited institution. Transfer students must complete twenty percent (20%) of required credits for a certificate or degree at CWI.
