## **Program Learning Outcomes**

Upon successful completion of this program, students will be able to:

- · Maintain an ethical and compassionate approach to patient-centered care in the operating room.
- · Uphold the highest standard of sterile technique.
- · Understand the limitations and duties of the scope of practice for surgical technologists.
- · Possess a thorough knowledge of anatomy and physiology and be able to apply that knowledge in a surgical setting.
- · Anticipate the needs of the surgical team before, during, and after a procedure.
- · Possess solid comprehension of surgical instrumentation and equipment and their uses.
- · Understand and use appropriate medical terminology.
- · Appropriately handle and dispose of sharps and infectious waste.
- · Recognize the value of teamwork and be able to function well in a team environment.
- · Demonstrate a working knowledge of surgical pharmacology and anesthesia.
- Synthesize moral and ethical reasoning with emerging issues in healthcare as well as advances in surgical procedures, techniques, and technologies.
